***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The invention is directed to a cathodoluminescent display device with a display screen of luminescent picture elements. At least one electron beam generated by an electron gun enters into a two-dimensional slalom guide arranged in rows and columns that define an array of cells opposite the picture elements. The beam is slalom guided by means of slalom focusing. Subsequently, the electron beam is extracted from a selected cell of the slalom guide towards a corresponding picture element.

Independent claims 1 and 15 identify, inter alia, the uniquely distinct features, "wherein the beam guide comprises a two-dimensional slalom guide arranged in rows and columns that define an array of cells opposite the picture elements, and the extraction means are arranged to extract the electron beam from the two-dimensional slalom guide."

Stanley (US Patent No. 4,215,293) teaches a cathodoluminescent flat display device with each cathodoluminescent element corresponds to a plurality of apertures of a channel. The beam guide of Stanley is formed of a horizontal guide, a transition guide, and a vertical guide. In operation, an electron beam first travels horizontally through the horizontal guide, then deflects at right angle by the transition guide, then through one of the vertical guide of a channel, and finally deflected at a designated point through one of the apertures by a corresponding electrode strip toward the screen. The

horizontal and transition guides, formed of electrodes, are at an offset from the display area (and thus the cathodoluminescent elements). Thus, Stanley does not teach or suggest above claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
